PROBLEM...

Understanding parsing is not always intuitive

- Abstract grammars.
- States, tables and actions.
- Parsing is not always intuitive.
- A visual representation is needed.

COMPYFI

Turning LR(0) parsing into something visual
and interactive.

Input → Lexer → Tokens
Grammar → Parsing → Result

Interactive compiler visualization.

GRAMMAR

- Conditional structures
- Loop support
- Nested blocks
- Recursive statements
- LR(0) compatible

$P' \rightarrow P$

$P \rightarrow B$

$B \rightarrow \{ W \}$

$B \rightarrow \{ \}$

$W \rightarrow W S$

$W \rightarrow S$

$S \rightarrow \text{while} (C) B$

$S \rightarrow \text{if} (C) B$

$S \rightarrow i;$

$C \rightarrow i < i$

Faculty of Engineering UNAM

Free / Institutional Donation

Support education
with your donation

- ✓ No academic cost
- ✓ Support the community
- ✓ Contribute to education
- ✓ Institutional impact

Your support helps make quality
education possible at UNAM.

Individual License for Self-Directed Learning

\$20 USD

Annual

Learn at your own pace
and from anywhere

- ✓ Complete individual access
- ✓ Learn at your own pace
- ✓ Updated resources
- ✓ Basic email support

Perfect for students and professionals
who want to keep learning.

Public and Private Universities

\$850 USD

Annual

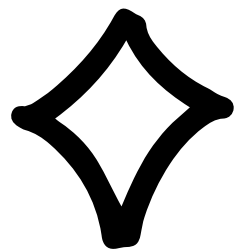

Full institutional
access

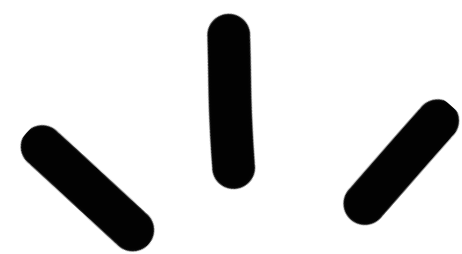

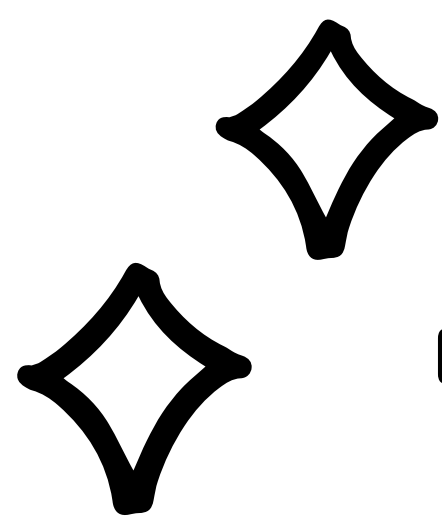

- ✓ Access for the entire institution
- ✓ Complete educational resources
- ✓ Administrative management
- ✓ Priority technical support

Ideal for institutions seeking to
strengthen education.

TEACHING THE PROCESS, NOT JUST THE RESULT

**Compyfi transforms LR(0) parsing into
a visual and interactive learning
experience.**
